

Model :
3D150 & 3D150L

**6" WIDE UNIVERSAL
LABEL REWIND UNIT**

Designed & Manufactured
in the UK

Multi-
Function

Optional 'bolt-on' label
slitter attachment

Model : 3D150 & 3D150L (lite)
**Universal 6" Wide Label
Rewind Unit**

The New Universal Label Rewinder **3D150** (replaces our popular **3D2071** model). The **3D150** uses dancing arm control to ensure no stress is placed on the printhead. It has adjustable speed and uses dynamic braking for precise control and reliability (no clutch and brake mechanism).

The **3D150** keeps all the features of the **3D2071** but with a reduced footprint (260mm x 275mm). Also available is the **3D150L**. This is a 'lite' version of the standard 3D150 that can be used on-line only (rewind direct from a printer). See below for full features.

Key Features Include

- ◆ Handles label reels up to 6" wide and 12" diameter.
- ◆ On-line (from printer) and Off-line (Reel-to-Reel) Rewind capability.
- ◆ Inside/outside wind selector (control easily accessible on top of unit).
- ◆ Variable speed control up to 33m/min (76mm core).
- ◆ Dancing Arm Control (eliminates all stress on the printhead and increases printhead life).
- ◆ Universal rewind mandrel for winding on to coreless, 44mm or 76mm cores.
- ◆ Compatible with all thermal/thermal transfer printers (up to 35m/min).
- ◆ Optional On-line and off-line slitting - up to 5 blades (slitter can be purchased separately at a later date).
- ◆ Direct drive motor with dynamic braking (no unreliable clutch and brake mechanism).
- ◆ Optional Reel Guide Robust coated-steel chassis
- ◆ Optional Digital Label Counter.
- ◆ Designed and Manufactured in the U.K.
