

Model : 3DAP series

*Bottle/Wrap-around
Labeller*

Fully
Synchronised

*Increase the efficiency of labelling
cylindrical containers.*

Model : 3DAP series

Semi -automatic Bottle/Wrap-around Labellers

Models Available

Model	Label Width (Max)	Reel Dia (Max)
3DAP255	140mm	300mm
3DAP260	190mm	300mm

Optional

- Hot-foil encoder
- Digital label counter
- Special photocell for transparent labels

The 3DAP series of semi-automatic wrap-around labellers increase the efficiency of labelling cylindrical containers. Ideal for low to medium volume labelling output.

Advantages of using the 3DAP series over hand applying include:

- Increased productivity
- Precise and repeatable label placement
- Reduced waste
- Professional look to your finished products

Key Features Include:

- Stepper Motor control
- Single or Dual (front/back) label placement in single operation
- Handles label widths of 140mm or 190mm (model 3DAP260 or 3DAP255)
- Max Label length 140mm or 200mm (model 3DAP260 or 3DAP255)
- Max reel diameter 300mm
- Handles bottle diameters from 20mm to 150mm
- Footswitch operated
- Label wiped-on with pneumatic controlled roller.
- Variable speed—label feed and bottle rotation fully synchronised. (max 30m/min)
- Weight – about 20 Kg
- Overall dimensions - 850 x 500 x 210 mm

Note: Requires 5-8 Bar, clean / dry air supply (6mm hose).
